Gameplay programmer

Game programmer student with a background in Quality assurance. Interested in system design of code, Player experience and finding new ways to solve technical problems. Comfortable with working with people that can contribute with different aspects to the game and learning about new aspects of development.

Projects

TrashBashers - Gameplay System & UX

Futuregames, Game Programmer | 2025

Developed all the systems that complimented the game, Timer, Scoring system. The main menu/pause menu. Endscreen.

Evilution-Lead Programmer

Futuregames, Game Programmer | 2026

I was the lead programmer that directed the code development, Made the Turnbased combat, Camera system, Level swapping,

OverBrewed -NPC system & Player movement

Futuregames, Game Programmer | 2026

I developed the NPC system to let the store vendor allow to serve customers. That would walk in and walk out and stand in a line.

And player movement, And then the potion holder when crafting, A animation that would play out when the player is crafting a potion.

AI Frendo-Programmer

GameJam | 2026

I was the programmer that setup the gameplay aspect that compliment the AI talking to you. The pictures that would show and the answers that would be accepted. And the Cursed mode and the ending that would exit the game.
